

**FIELD TRIP  
PARENTAL PERMISSION  
CAREER PATH HIGH**

**09/26/2019**

Dear Parent or Guardian:

As a 10th grade team, we have planned an engaging grade level project for our 10th grade class. This year's project surrounds ethical issues within genetic testing. To better understand genetics, we will be taking our **10th grade class on a field trip to the Natural History Museum of Utah**. The museum has a fantastic exhibit that explores the complexity of DNA and Ecosystems with a focus on Utah's extraordinary biological diversity. We believe that this field trip will help students better understand DNA and how it works so they can better understand the ethics behind genetic testing.

This field trip is planned to take place during the next 10th grade workshop happening on **Friday, October 11th. We will leave the school at 8:30 a.m. and return by noon. Students will be transported by school bus.** This all takes place during the regularly scheduled 10th grade project required time. We need to have all attending students return this field trip form by October 4th. Please sign and return the form digitally or in person to Mrs. Jackson or Ms. Chandler.

My child \_\_\_\_\_

may attend this field trip to the Natural History Museum of Utah on October 11, 2019.
